

New Packaging Procedure for All Kits and Gasket Sets

New packaging method.

As part of Corken's continuous improvement program, new packaging procedures for kits and gasket sets have been implemented. Effective immediately all repair/rebuild kits and gasket sets shipped from Corken reflect the new packaging improvements. See photos comparing the new packaging method to the previous.

The new procedure enables customers to quickly identify each part number and quantity, shorten the time spent on routine maintenance, and ensure each part is used where needed.

Previous packaging procedure.

Solutions beyond products...
