

Factory Service Center and Performance Testing to Like-New Standards

To better serve its customers, Corken now offers a factory service center for compressors, pumps, and bypass valves.

Written Evaluation: Upon arrival each unit is fully inspected and a detailed report is submitted to the customer.

Quality You Can Trust: All services are performed by one of Corken's highly trained technicians using genuine factory parts. Each unit is factory tested to like-new standards and comes with a one year warranty.

Quick Turnaround Time: To minimize downtime, most repairs are completed in one week or less and expedited service is available upon request.

Benefits:

- Complete product evaluation per factory standards
- All work performed by highly trained factory personnel
- Genuine factory parts
- Performance testing
- One year warranty on parts and labor
- Great opportunity to upgrade older equipment to latest technological improvements

Compressor Test:

- Orifice testing to ensure valves are fully functional
- Pressure testing to ensure packing is sealing to factory standards
- Leak testing for all pressure containing parts

Pump Test:

- Differential pressure and flow rate testing to factory standards
- Leak test to factory standards
